by deleting the amendatory language of Section 1 and by substituting instead the following:

68-1-805

In the interest of public health, every newborn infant shall have its oxygen saturation level tested by pulse oximetry testing on the right upper extremity and either lower extremity prior to discharge from a hospital or a birthing center. If the infant's oxygen saturation level is below ninety-two percent (92%) when evaluated, the infant shall be referred for further cardiac evaluation.
